

A Book About Me.

My name is Lucas and I am
a great kid! There are a lot
of special things about me.

I can write my name.

I am very funny. I like to
joke around a lot with
people and make funny
faces.

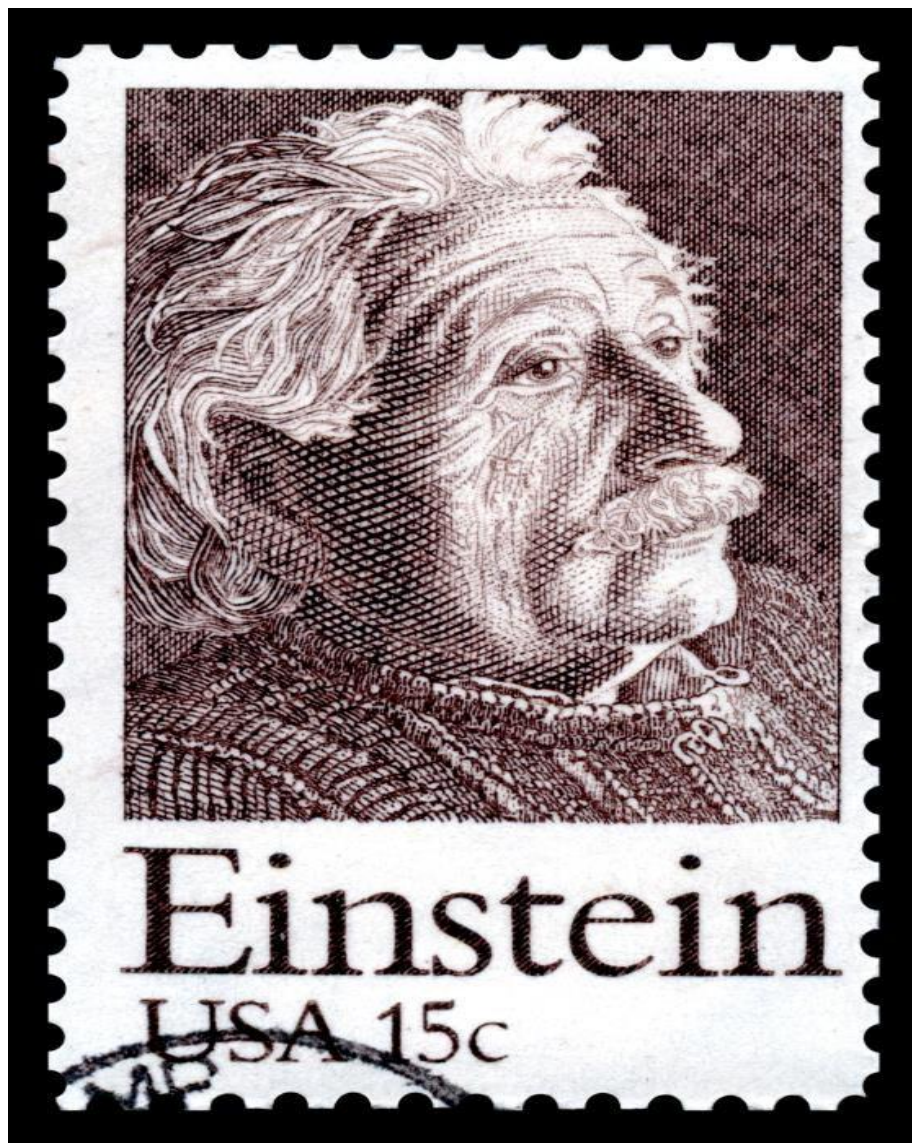

I love animals and take good care of my dog. I have a very good memory and know the names of many kinds of dogs.

I am also very smart and know lots of facts about other animals. I spend a lot of time learning about sea animals.

When I grow up I want to be a scientist. A very smart scientist alive a long time ago was Albert Einstein.

Another special thing about me is that I have Autism.

Autism means that my brain works differently than other people's brains. This is not good or bad, it is just part of me.

Albert Einstein may have had autism too!

Because I have autism, I have a good memory, am very smart, and love animals. There are also some things that are hard for me because I have autism.

I am very active and have a hard time calming my body.

I play by myself a lot. I have a hard time asking others to play and making new friends.

Loud noises bother me and
it is hard for me to deal with
unexpected changes.

Everybody has things they are good at and things they have a hard time with. That is what makes us unique! I love all the ways autism makes me unique!
